

# Welcome!

Thank you for being a member at Skillthrive! Use this quick start guide to understand the Challenge and find helpful resources.

Remember to explore [Solutions on Skillthrive](#) to learn how others tackle the code, and be sure to [join our Discord channel](#) to connect, ask questions, and lend a hand. You can join anytime from your [account page on Skillthrive](#).

Good luck and have fun!

– Hunter

## Brief

Your Challenge is to create a responsive, one-page landing page for a personal site. This site intends to be used to share a little about the person, Andrew Chapman, and include links to their social channels and a "contact me" button for emailing Andrew.

Your Solution should be as close to the included design as possible. Do not replace fonts, colors, or other styles. Treating this like actual client work is most helpful to your skill development.

You can use any language, library, or framework to complete the challenge.

### Your Challenge is complete when:

- The website is as close to the original design as possible
- The website is responsive and viewable on multiple screen sizes-
- Includes appropriate semantic HTML
- Includes metadata tags for SEO best practices
- Elements have the appropriate hover and focus states
- Clicking on the "contact me" button launches an email client to send an email to andrew@example.com
- Clicking on the social links opens a new tab for the page. Use the web address to the homepage for the associated social channel. For example, use "https://twitter.com" for Twitter
